April 20, 2020
For Immediate Release

Christian County now has nineteen (19) positive cases of COVID-19 reported. It will not be surprising if more new cases are reported in the coming weeks. If an increase in positive cases occurs, it could be attributed to the increased number of tests that are available; which allows for individuals with only mild symptoms to be tested.

Public health officials have speculated for several weeks that more cases were likely present than were being accounted. Without the availability of testing, those individuals weren't being reported.

The discovery of more positive cases can be concerning for some residents. Public Health officials believe that the more cases being found will lead to expanded investigations that will help curb the virus further. This will allow those needing to be quarantined into a situation where they can be safe for themselves and others more quickly.

Stay resolved Christian County, you are doing a tremendous job with social distancing and it shows!
