For Immediate Release

We just received information from the State of Missouri, notification of the twenty-first (21) case in Christian County. This person had self-quarantined after a possible exposure and began symptoms several days later. They immediately got tested and continued self-quarantine. They were actually considered "recovered" under CDC guidelines as of April 7th. We did not get the test results until today. Long after a chance to have done the contact tracing. We have not had any other associated cases reported.
