FOR IMMEDIATE RELEASE

Christian County Health Department Reports Nine New Cases

Christian County Health Department reports nine (9) new COVID-19 cases. To date, Christian County has a cumulative total of one-hundred eighty-five (185) cases (one-hundred seventy (170) confirmed and fifteen (15) probable). The health department is currently monitoring eighty-four (84) active cases. The county has reported one (1) COVID-19 related death.

With the recent significant increase in positive cases, the health department would like to remind the community that at this point-in-time there is a potential for you to be exposed at any public location. The best way to prevent illness is to avoid being exposed to the COVID-19 virus. The health department is urging all community members to wear a face mask while out in the public. Masks are especially important in situations where staying more than six feet away from others is a challenge. Wearing a mask in public offers protection to people around you, especially those who are higher risk of getting sick. Please keep in mind that you may be infected with COVID-19 without realizing. Wearing a face mask significantly reduces the risk that you will spread the virus unknowingly.

Other ways to help decrease your risk of contracting or spreading COVID-19 includes:

- Washing your hands frequently
- Avoiding touching your face
- Avoiding close contact with people who are sick
- Practicing social distancing of at least six feet
- Avoiding situations where you cannot practice social distancing, such as large gatherings and crowded places
- Sneezing or coughing into a tissue, or the inside of your elbow
- Avoiding touching frequently touched surfaces
- Staying home if you feel sick, and seek medical attention
