FOR IMMEDIATE RELEASE

Sixty-Three New Cases of COVID-19 Reported in Christian County

Christian County Health Department has received sixty-three (63) new COVID-19 cases over the past four (4) days. Christian County has a total of four-hundred fifty-eight (458) cases (four-hundred twenty-six (426) confirmed and thirty-two (32) probable). The health department is currently monitoring one-hundred fifty-eight (158) active cases. Christian County has one (1) COVID-19 related death.

Of the four-hundred fifty-eight (458) total number of cases reported in Christian County, fifty-six (56) cases were reported between March 17th and June 30, 2020. During the month of July the health department received two-hundred thirty-eight (238) additional cases. So far, from the timeframe of August 1st through August 14, 2020 the health department has received an additional one-hundred sixty-four (164) cases.

Of the four-hundred fifty-eight (458) total number of COVID-19 cases reported in Christian County since March 17th, eighteen (18) individuals have been hospitalized. At this time, six (6) Christian County residents remain hospitalized with three (3) of those individuals currently on a ventilator. Not all of the hospitalized individuals had co-morbidities that contributed to their hospitalization.

Symptoms of COVID-19 include: · Fever or chills · Cough · Shortness of breath or difficulty breathing · Fatigue · Muscle or body aches · Headache · New loss of taste or smell · Sore throat · Congestion or runny nose

Anyone experiencing symptoms of COVID-19 should stay home and seek medical attention.

With the recent significant increase in positive cases, the health department would like to remind the community that at this point-in-time there is a potential for you to be exposed at any public location. The best way to prevent illness is to avoid being exposed to the COVID-19 virus. The health department is urging all community members to wear a face mask during instances where staying more than six feet away from others is a challenge. The correct use of a face mask (having the face mask fully covering your mouth and nose) and the consistent use of a face mask will offer protection to people around you, especially those who are at higher risk of getting sick. Please keep in mind that you may be infected with COVID-19 without realizing it, so wearing a face mask correctly and consistently significantly reduces the risk that you will spread the virus to others unknowingly
